Introduction

The broad discussion in many circles about the plight of the non-prime consumer often uses assumptions about how these consumers think, what matters to them, and even what would be good for them. However, there is limited data that really explains their circumstances.

Elevate’s Center for the New Middle Class set out to understand the differences in attitudes, experiences and behavior between consumers with prime credit and those with non-prime credit.

This study represents results from a survey of 1217 U.S. consumers (607 with prime and 610 with non-prime credit scores). Of those, 311 self-identified as African American in ethnicity (107 with prime credit and 204 with non-prime credit).

Interviews were conducted November 30 through December 4, 2017.
Non-prime Americans

“Non-prime Americans” represent the New Middle Class. These are Americans with a credit score below 700, meaning that their access to credit is limited or curtailed. Non-prime is also often further divided into “near prime,” “sub-prime,” and “deep sub-prime.”

It is the Center’s objective to better understand non-prime experiences, attitudes, and behavior.

The following report seeks to understand the financial experience of prime and non-prime African Americans. This does so by comparing to general populations.
Executive Summary

One of the most interesting findings is the consistent way in which non-prime African Americans look a lot like the wider non-prime population, but that prime African Americans are more fragile compared to the wider prime population.

- Prime African Americans feel significantly less in-control than the wider prime population
- Prime AA are 15% less “satisfied” with their present financial situation than wider prime
- 21% less likely to never run out of money in a year compared to prime
- They are 53% more likely to say family or friends rely on them
- 38% more likely to say they use technology to manage finances more than the people around them
- 80% more likely to say that they live paycheck-to-paycheck
- 53% more likely to use a debit card for day-to-day purchases; 47% less likely to use a credit card; and, 65% more likely to use cash.
- They are 2.5x more likely to overdraft on a bank account
- 28% less likely to have $1,200 for a financial emergency
- Much less likely to turn to a credit card to cover a financial emergency
- 50% more likely to say they have “too much debt right now”
- 3x as likely to have every used a payday loan and 4x as likely to be using one now
- Carry credit card balances like the non-prime population
- Less confident they can meet long term financial goals

Financial sentiment

- 41% of non-prime African Americans say their finances cause them significant stress, but they are less likely to say so than general population non-prime
- African Americans are much more likely to say they are looking for new financial services or products
Executive Summary

Income and employment
- Non-prime African Americans are 29% less likely than general non-prime to report difficulty predicting income.
- African American households are no more likely to report an adverse employment event in the prior 5 years (job loss or pay reduction).
  - However, when they do report an adverse employment event, it is much more likely to be a drop in pay or drop in work hours.

Day-to-day financial management
- 51% of non-prime African Americans say that they always find themselves living paycheck-to-paycheck.
- African Americans are much less likely to use a credit card for day-to-day purchases and more likely to use cash.

Covering a financial emergency
- Only one in six say they would have money available to cover a $1,200 unexpected emergency.
- One in eight non-prime African Americans simply say they would not be able to cover it at all.

Debt
- Non-prime African Americans are more likely to use payday loans and paycheck advances and much less likely to have bank loans, mortgages, and credit card balances than general non-prime households.
- Prime African Americans are more likely to say they have too much debt compared to other primes and non-prime African Americans are less likely to say so compared to other non-primes.
- More likely than counterparts to have used a payday loan and much more likely to be using one now.
- Prime AA are 50% more likely to have a bank loan and non-prime AA are half as likely.

Financial planning
- Non-prime African Americans are more likely say that they have the skills to manage their finances well.
- Non-prime African Americans are more likely say that they can reach short-term savings goals.
- African Americans are less likely to report that they learned financial management from their parents.
Financial sentiment
Finances causing significant stress

Non-prime African Americans are less likely than the general non-prime population to report that their finances are causing them significant stress.

On a scale of 1 to 5, where 1 is ‘strongly disagree’ and 5 is ‘strongly agree’, how much do you agree or disagree with the following statements?

“My finances cause me significant stress”
% Top-2 Box: Agree / Strongly agree

Source: Marriage and money, Dec. 2017
One in five prime African Americans feel like they have little control over what happens to them. They are 50% more likely to think that way compared to the general prime population.

On a scale of 1 to 5, where 1 is ‘strongly disagree’ and 5 is ‘strongly agree’, how much do you agree or disagree with the following statements? Q27_6. I am confident that I can meet my short-term saving goals

Source: Marriage and money, Dec. 2017
While non-prime African Americans don’t differ from the general non-prime population on satisfaction with their financial situation, prime African Americans are less likely than the general prime population to report satisfaction.

On a scale of 1 to 5, where 1 is ‘strongly disagree’ and 5 is ‘strongly agree’, how much do you agree or disagree with the following statements?

Source: Marriage and money, Dec. 2017
African Americans are much more likely to report that friends and family rely heavily on them for help with finances. One in four prime African Americans have those dependences.

Prime African Americans are 53% more likely to have family or friends that depend on them.

On a scale of 1 to 5, where 1 is 'strongly disagree' and 5 is 'strongly agree', how much do you agree or disagree with the following statements? Q27_14. Friends and family rely heavily on me to help with their finances

Source: Marriage and money, Dec. 2017
Looking for new financial services

Prime African Americans are much more likely to always be looking for new financial services product or providers.

“I am always looking for new financial services products or providers”

% Top-2 Box: Agree / Strongly agree

On a scale of 1 to 5, where 1 is ‘strongly disagree’ and 5 is ‘strongly agree’, how much do you agree or disagree with the following statements? Q27_19. I am always looking for new financial services products or providers.

Source: Marriage and money, Dec. 2017
Predictability of income

Non-prime African Americans are 29% less likely to report difficulty in predicting monthly income than the general non-prime population.

Q11. How easy or difficult is it for you to predict next month’s income for your household? Would you say it is...?

Source: Marriage and money, Dec. 2017
Prime African Americans are much more likely to have experienced a drop in pay or work hours.

Q28_2. You had your work hours and/or pay reduced - Major Life Events in Past 5 Years - During the past 5 years, has your household experienced any of the following significant major life changes or financial events?

Source: Marriage and money, Dec. 2017
Day-to-day financial management
Prime African Americans are 38% more likely to report that they use technology to manage their money far more than other people they know.

On a scale of 1 to 5, where 1 is 'strongly disagree' and 5 is 'strongly agree', how much do you agree or disagree with the following statements? Q27_15. I use technology to manage my money far more than other people I know.

Source: Marriage and money, Dec. 2017
Living paycheck to paycheck

Once again, African American prime are less stable than their prime counterparts and African American non-prime are a bit more stable than their non-prime counterparts.

On a scale of 1 to 5, where 1 is ‘strongly disagree’ and 5 is ‘strongly agree’, how much do you agree or disagree with the following statements? Q27_4. I always find myself living paycheck to paycheck -

Source: Marriage and money, Dec. 2017
Paying for day-to-day expenses with a debit card

Once again, the prime African American is a bit of the outlier. They are 53% more likely than general prime to say they use a debit card for day-to-day purchases.

Q22. How do you typically pay for day-to-day expenses (e.g., grocery shopping, etc.)

Source: Marriage and money, Dec. 2017
Paying for day-to-day expenses with a credit card

African Americans are less likely to use credit cards than average for their day-to-day purchases. Prime are 47% less likely and non-prime is 33% less likely.

Using a credit card for day-to-day expenses

Overdrafted a savings or debit account

Prime African Americans are as likely to overdraft a bank account as the non-prime population.

Frequency of overdrafting a bank account

% Top Box: “Regularly (monthly)”

- Total (n=607)
  - Prime: 3%
  - Non-prime: 11%

- African American (n=610)
  - Prime: 8%
  - Non-prime: 11%

Q18_16. Overdrafted a savings or debit account - Past 12 Month Financial Activities - Please indicate how often you engaged in the following financial activities

Source: Marriage and money, Dec. 2017
Covering a financial emergency
Money available to cover a $1,200 emergency

Non-prime African Americans have just as much trouble handling a $1,200 emergency with cash available to them.

The dramatic difference is that prime African Americans are 28% less likely than general population primes to have the resources on hand.

Q17. If you had one week to pay $1,200 for an emergency expense, such as a car repair or medical bill, where would you turn first to get the money? Answer: “Money currently in my checking or savings account, or on my prepaid or payroll card, or with cash”

Source: Marriage and money, Dec. 2017
Borrow from family/friends to cover a $1,200 emergency

When comparing to the general population, prime African Americans are less likely to turn to family and friends first in an emergency.

Non-prime African Americans are more likely to.

Q17. If you had one week to pay $1,200 for an emergency expense, such as a car repair or medical bill, where would you turn first to get the money? Answer: “Borrowing from a friend or family member”

Source: Marriage and money, Dec. 2017
Debt
Who non-prime African Americans owe money to

Compared to total non-prime populations, non-prime African Americans are less likely to carry mainstream debt (like credit cards, car loan, mortgage, and bank loans) and more likely to carry non-traditional debt (like installment loans, payday loans, and advance on a paycheck).

Q23. 'CURRENTLY USE' SUMMARY TABLE - Frequency of Using Forms of Debt - Which of the following forms of debt have you used? Answer: "Payday loan"

Source: Marriage and money, Dec. 2017
Prime African Americans are 50% more likely than overall prime to say they have too much debt.

Non-prime African Americans are less likely than general non-prime to complain of having too much debt.

On a scale of 1 to 5, where 1 is 'strongly disagree' and 5 is 'strongly agree', how much do you agree or disagree with the following statements? Q27_10. I have too much debt right now

Source: Marriage and money, Dec. 2017
Experience with a payday loan

18% of the general population have ever used a payday loan.

30% of general population non-prime have experience with a payday loan and 42% of non-prime African Americans have.

Q23. 'NEVER USED' SUMMARY TABLE - Frequency of Using Forms of Debt - Which of the following forms of debt have you used? Answer: “Payday loan” (Data represents the inverse of ‘Never’)

Source: Marriage and money, Dec. 2017
Currently use a payday loan

5 percent of non-prime Americans currently have a payday loan. Non-prime African Americans are twice as likely to have one.

Prime African Americans are four times as likely as prime Americans.

Q23. ‘CURRENTLY USE’ SUMMARY TABLE - Frequency of Using Forms of Debt - Which of the following forms of debt have you used? Answer: “Payday loan”

Source: Marriage and money, Dec. 2017
Prime African Americans are less likely to have a bank loan than overall non-prime people. Non-prime African Americans are almost half as likely as overall non-prime to currently have a bank loan.

Q23. 'CURRENTLY USE' SUMMARY TABLE - Frequency of Using Forms of Debt - Which of the following forms of debt have you used? Answer: “Bank loan”

Source: Marriage and money, Dec. 2017
Have ever had a bank loan

Overall prime and prime African Americans just as likely to have ever had a bank loan, but non-prime African Americans are 21% less likely than general to have ever had a bank loan.

Prime African Americans are as likely to carry a credit card balance as the non-prime population.

Q18_14. Carried a credit card balance - Past 12 Month Financial Activities - Please indicate how often you engaged in the following financial activities

Source: Marriage and money, Dec. 2017
Financial planning
Financial management skills and knowledge

Non-prime African Americans are 22% more likely than the general non-prime population to feel that they have the skills and knowledge necessary to manage their finances well.

On a scale of 1 to 5, where 1 is ‘strongly disagree’ and 5 is ‘strongly agree’, how much do you agree or disagree with the following statements? Q27_13. I have the skills and knowledge to manage my finances well

Source: Marriage and money, Dec. 2017

On a scale of 1 to 5, where 1 is ‘strongly disagree’ and 5 is ‘strongly agree’, how much do you agree or disagree with the following statements? Q27_13. I have the skills and knowledge to manage my finances well

Source: Marriage and money, Dec. 2017
Planning for major expenses

Non-prime African Americans are more likely than the rest of the non-prime population to regularly plan for major expenses.

Q18_2. Planned for major expenses - Past 12 Month Financial Activities - Please indicate how often you engaged in the following financial activities

Source: Marriage and money, Dec. 2017
Hope for achieving long-term goals

Strikingly, there is not as much disparity in the African American population for achieving goals for becoming financially secure as there is in the wider population.

On a scale of 1 to 5, where 1 is 'strongly disagree' and 5 is 'strongly agree', how much do you agree or disagree with the following statements? Q27_5. I am confident that I can meet my long-term goals for becoming financially secure

Source: Marriage and money, Dec. 2017
Non-prime African Americans are more confident than general population non-primes that they can reach short-term savings goals.

On a scale of 1 to 5, where 1 is 'strongly disagree' and 5 is 'strongly agree', how much do you agree or disagree with the following statements? Q27_6. I am confident that I can meet my short-term saving goals

Source: Marriage and money, Dec. 2017
Learning financial management

African Americans are less likely to report that they learned financial management skills from their parents.

Q25. Select all the ways in which you learned how to manage your finances: Parent’s instruction

Source: Marriage and money, Dec. 2017
Methodology

The primary purpose of this study was to determine how nonprime Americans were similar or different from those with prime credit on a range of behaviors and attitudes.

**Interview Dates:** December 6-14, 2016

**Sample Specs:**
- Total Respondents = 1,217
- Sample Source: Research Now Consumer Panel

**Qualification Criteria:**
- Ages 18-64
- Personal income: Any
- Geography – U.S. Rep
- Has primary or shared responsibility managing HH finances
- Employment: No students or unemployed
- Has a checking or savings account

**Survey Instrument:** 15 minute online questionnaire
